

Setting fenestration standards for housebuilding

VEKA

Housebuilding at scale relies on window and door standards that can be applied consistently and confidently across:

- ◇ Repeatable house types and standard designs
- ◇ Multiple sites, regions and exposure conditions
- ◇ Evolving UK building regulations
- ◇ Long-term asset performance expectations

VEKA supports national and regional housebuilders in the development and review of fenestration standards, helping ensure they remain practical, compliant and repeatable across sites, regions and delivery partners.

What **VEKA** supports

- **Early, standards-led decision-making** during the development or review of framework standards
- **Repeatable fenestration standards** applied consistently across house types and sites
- **Alignment with current UK building regulations** and recognised industry standards
- **Long-term suitability supported** through durable PVCu systems and controlled variation

VEKA's role in housebuilder standards

With 40 years' experience in the UK, **VEKA** designs and manufactures PVCu window and door systems to support the development and review of housebuilder window and door standards, delivered through a UK-wide fabricator network.

CREDIBILITY ANCHORS

- **PAS 24** enhanced security performance capability
- **BSI Kitemark** accreditation across VEKA products
- **ISO 9001** (Quality), **ISO 14001** (Environmental) and **ISO 50001** (Energy) certification
- **Thermal performance capability** aligned with current regulatory requirements
- **98%+ On Time** in Full delivery
- **PVCu window life expectancy** of at least 35 years (BRE / BPF)
- Clear, accurate product information developed in line with the **Code for Construction Product Information (CCPI)**

VEKA

Reviewing or updating your window & door standards?

VEKA can support a review of existing window and door standards to assess compliance and long-term suitability.

For specification support and technical review please contact **Tim James** at Tjames@veka.com
